

RIVERLAKE PARTNERS SELLS STOCK EQUIPMENT COMPANY

Schenck Process of Germany Buys Stock Equipment Company

PORTLAND, Ore – June 7, 2006 – Less than three years since purchasing global energy leader Stock Equipment Company, Inc., Riverlake Partners LLC sold the company to Schenck Process of Darmstadt, Germany, making near 4x its initial investment.

“The significant return from the Stock transaction sets the stage for the entire Riverlake portfolio, as well as investments to come,” said Erik Krieger, founder and managing member of Riverlake Partners. “Stock validates the viability of our core investment strategy of acquiring lower middle market companies, driving change, and making improvements through the hands-on strategic and operating expertise of our partners. The Riverlake process is unique and we expect to deliver ongoing superior returns in this fund as well as future funds.”

Riverlake Delivers with First Investment

Under the guidance of Chuck Grant, a Riverlake operating partner, and leadership of Stock president William Downs, Stock annual revenues increased 57.1 percent to \$66.3 million (compounded annual growth rate of 16.3 percent), exceeding expectations and delivering results more quickly than anticipated. Specifically, Riverlake attributes its high returns to establishing a long-term executable strategic plan and immediately making operational improvements, including:

- Creating stand-alone company and separation from division of a Fortune 500 company
- Re-organizing company along functional lines versus independent operating units
- Streamlining internal reporting and organizational structure
- Establishing a company-wide new product development program and team
- Restructuring underperforming UK operations
- Re-branding and integrating global product line
- Driving new business development through integrated global marketing programs
- Increasing resource commitment and focus on China market
- Extending and diversifying product line to include bulk material handling
- Procuring and implementing global CAD and ERP systems
- Lowering research and development costs and improving sales and support operations through Indian expansion

“When we acquired Stock Equipment, the power industry was coming out of an unprecedented downturn. We saw the potential of increased market activity, a positive outlook on coal power alternatives and new clean air technologies on the horizon,” said Grant. “In less than three years we’ve exceeded our expectations for increasing company value. By making appropriate

investments in people, structure and technologies we were able to quickly take this business to the next level. Working closely with the Stock leadership team has been professionally and financially rewarding. I believe our up-front, honest, cooperative style made a measurable difference in building a strong, committed and motivated team. In the end, this is what delivers results.”

Riverlake led the acquisition of Stock, gaining control of the company in October 2003. Key Principal Partners (KPP), based in Cleveland, Ohio, provided subordinated debt and preferred equity while LaSalle Bank provided the senior credit facility.

“Riverlake brought a clear outside perspective and the expertise to immediately identify actionable strategies that improved operations at all levels of the company,” said Downs. “Their contributions not only

increased our revenue potential, but our ability to grow and perform long-term as well. Working with Riverlake has been a very positive experience for the entire management team as well as the company.”
